LISP – Intermediate Division

1. **01-02 C1 Lisp Programming**

   Evaluate: (ADD (SUB 4 5) (ADD 6 3) (MULT 4 8))

2. **02-03 C1 Lisp Programming**

   What is the value of the following LISP expression?

   (CDR (CAR (CDR '((b c) (a d f) (d)))))

3. **03-04 C1 Lisp Programming**

   Evaluate: (MULT (ADD 2 3) (SUB 4 6))

4. **04-05 C1 Lisp Programming**

   Evaluate: (EXP (DIV (MULT (ADD 2 (SUB 4 2)) 3) 2) 4)

5. **05-06 C1 Lisp Programming**

   Evaluate: (DIV (MULT (ADD 2 3) (SQUARE 2)) (SUB (EXP 2 3) (ADD 2 1)))

6. **06-07 C1 Lisp Programming**

   Evaluate: (DIV (MULT (ADD 1 4 5) (SUB 7 2)) (EXP 5 2))

7. **07-08 C1 Lisp Programming**

   Evaluate the following expression:

   (ADD (ADD 3 4) (SUB 5 2) (MULT 3 2) (EXP 2 3))

8. **08-09 C1 Lisp Programming**

   Evaluate the following expression:

   (DIV (ADD (ADD 3 4) (MULT 4 2)) (SUB 8 5))

LISP – Intermediate Division

9. **09-10 C1 Lisp Programming**

   Evaluate the following expression:

   (ADD (SUB 9 5) (EXP 2 3) (MULT (DIV 9 3) 5))

10. **11-12 C2 Lisp Programming**

    Evaluate the following expression:

    (ADD (SUB 5 2) (MULT 2 3) (DIV 9 3))

11. **11-12 C4 Lisp Programming**

    Simplify the following expression:

    (CAR (CAR (CDR (CDR ‘(a (b c) (a (b c))))))

12. **12-13 C2 Lisp Programming**

    Evaluate the following expression:

    (ADD (MULT 2 3) (EXP 3 2) (SUB 9 5) (DIV 8 4))

13. **12-13 C4 Lisp Programming**

    Simplify the following expression:

    (CAR (CAR (CDR (CDR (CDR ‘(1 (2 3) 4 ((5 6) (7 8) 9)))))))

14. **13-14 C2 Lisp Programming**

    Evaluate the following expression:

    (ADD (MULT 2 5) (EXP 3 2) (SUB 4 (DIV 6 2)))

15. **13-14 C4 Lisp Programming**

    Evaluate: (CAR (CDR (CDR ‘(1 (2) (3 (4))))))

LISP – Intermediate Division

16. **14-15 C2 Lisp Programming**

Evaluate the following expression:

(ADD (ADD 2 3) (MULT 4 5) (SUB 6 2) (EXP 2 3))

17. **14-15 C4 Lisp Programming**

Evaluate the following expression:

(CDR (CAR (CDR (CAR '((b (c d) (e f g)) (h (j k)))))))

18. **15-16 C2 Lisp Programming**

Evaluate the following expression:

(MULT (ADD 2 3 1 (EXP 3 2)) (SUB (MULT 4 2) (DIV 10 2)))

19. **15-16 C4 Lisp Programming**

Simplify the following expression:

(CDR (CAR (CDR (CDR '(a (b c) (d a (b c)) (a b))))))
